OVERVIEW

- With over one year of experience in building web and mobile applications. I have a strong understanding of HTML, CSS, and JavaScript, along with hands-on experience using React, Next.js, and React Native.

SKILLS

Programming languages — HTML, CSS, Javascript, Typescript, **Frameworks** — ReactJS, NextJS, React Native, **Version control** — Git, Bitbucket, **Languages** — English(TOEIC score of 620)

PROFESSIONAL EXPERIENCE

Kochan

GOSOFT TECHNOLOGY CO.,LTD

Position: Front End Developer

Project Description:

- An e-commerce platform designed specifically for the Aerobic community and allows users to share interests and attend events.

Responsibilities:

- **Configured Notifications with Firebase Cloud Messaging:** Set up and managed both the sending and receiving of notifications, ensuring that users are informed about key updates or events in the app.
- **Collaborated with Product Owner:** Engaged in discussions with the Product Owner to address project limitations and challenges, identifying solutions to enhance product functionality and user experience.
- **Configured Multi-Environment Source Setup:** Established configurations for multiple environments (e.g., development, staging, production) to streamline testing and deployment processes.
- **Managed Music Playback and Events:** Oversaw the playlist management and handled various audio controls, including play, pause, and repeat functions, ensuring a seamless listening experience.
- **Debugging and Issue Resolution:** Identified and fixed bugs, enhancing app stability and functionality.
- **Design Collaboration:** Worked closely with the designer to review and discuss design elements, providing input on feasible and optimal design choices for the project's goals and constraints.
- **Implemented OTP Confirmation Using Native Code:** Developed a native function to send OTP confirmation messages to users, enhancing security and user verification within the app.
- **Scripted Automated Test Releases with Fastlane:** Developed a Fastlane script to automate the release of test versions, ensuring an efficient and reliable delivery of updates to testers, reducing manual workload and improving the consistency of test releases.
